## Land mammals are here!

**XC959825**

0:00 1:13

**Brown Howler *Alouatta guariba*** · song  
*Dante Buzzetti*

2025 started with welcoming land mammals to Xeno-canto. First up were sets by Koen Betjes, Daan Drukker, Marc Anderson and Dante Buzzetti that they prepared for the occasion. Thanks guys! In the mean time many of you have added sounds, or made mammal recordings already in XC visible. We made a few celebratory spotlights highlighting some recordings from the initial batch. This is a recording from 1997. Not too long ago, but even recordings from such a recent past may be of soundscapes lost. Keep recording!

## Latest News

[Add news item](#)

**February 3, 2025** [Edit](#) [Delete](#)

Julien Barataud is adding a whopping 3500 Orthoptera recordings. A great boost for the coverage of European grasshoppers and crickets. Thanks for sharing, Julien! Also thanks to Baudewijn Odé for his assistance in getting the data in good shape.

Also Paolo Fontana adds a great set, some 900 grasshopper recordings, mostly from Italy, and some from France, Greece, Georgia and Mexico, with many new species. Thanks to Giacomo Ortis for his help with working out the metadata!
